means for searching;

means for building a requisition that uses data obtained from said database relating to selected matching items on said order list;

means for processing said requisition to generate purchase orders for said selected matching items.

The electronic sourcing system according to claim 80, wherein the means for searching comprises:

means for searching the database for segments of data relating to items associated with a vendor that contain vendor items that match the product information for said at least one desired item; means for generating a hit list of such vendor segments; and means for selectively viewing the vendor segments identified for said hit list, and

wherein the means for generating an order list comprises means for selecting desired items

from a vendor segment identified by said hit list.

3 82. The electronic sourcing system according to claim 80, wherein the means for entering product information fully describes at least one desired item.

The electronic sourcing system according to claim 80, further comprising means for determining the applicable price of a selected matching item.

The electronic sourcing system according to claim, 80, further comprising means for determining whether a selected matching item is available in inventory.--
